The Sproll Curriculum

Cycle I — Pops: Things, Differences, and Counting

Sproll 10 of 40 · follows Sproll 09: Parts With a Past

[Illustration: the four small icons from the end of Sproll 09: a dot, a crossed shape, a connecting line, a lens]

Let's build a small world.

[Illustration: a plain empty page, ready to begin]

(an empty world) **Pop a sun.**

[Illustration: an orange sun shape now on the page, with a plain ground line beneath]

[Illustration: the sun and ground, now with a simple tree shape added nearby but not yet connected to the ground]

Bind the tree to the ground.

[Illustration: the tree now connected to the ground line with a small trunk, sun and ground unchanged]

[Illustration: the same small scene, with a faint, crossed-out second sun sketched off to the side, not part of the main scene]

Refuse a second sun.

Not this way. One sun is enough.

[Illustration: the small world scene, sun ground and tree, framed as a finished picture]

Rule: what does the world look like?

Collapse to this.

[Illustration: the same construction, with a different rule label above and a numeral 2 beneath, since only sun and tree were actually chosen (refused sun does not count)]

2

[Illustration: the full ledger of the build: Pop sun, Pop tree, Bind tree-ground, Refuse second sun, four entries stacked as one history]

One record. All four moves.

[Illustration: the small world scene once more, calm and complete]

Four moves. One growing history.

Many worlds you can build.

[Illustration: a blank page with just a boundary circle drawn on it, empty inside, as if inviting the next world to be built with a border first]

Every world needs a boundary.

What belongs? What doesn't?

[Illustration: a closing image looking back over Cycle I: small versions of all the recurring devices, a dot, a ledger strip, the boundary circle, arranged quietly together]

A Note for Grown-Ups

This book introduces no new primitive; its entire purpose is consolidation, using all four Spherpap primitives together in one small, deliberately simple construction. A child who can narrate this book's little world back, in their own words, using the words Pop, Refuse, Bind, and Collapse correctly, has completed Cycle I's actual goal.

This closes the historical-construction foundation the rest of the curriculum builds on. Cycle II begins from a genuinely new question, what belongs inside a boundary and what does not, which requires nothing beyond what this book has already established, but organizes it differently: instead of building one history at a time, the child will begin working with many possible Pops at once, some admitted and some not, under a stated rule of membership.

Sproll 11: The Box begins Cycle II of the Sproll Curriculum.
